## Press Release: ECEG becomes an official campaign partner of the EU OSHA's 'Safe and healthy work in the digital age' campaign 2023-25

We are happy to share that as of 25 January, ECEG is an **Official Partner of the EU OSHA's 'Safe and healthy work in the digital age' campaign 2023-25**.

The campaign promotes prevention culture against main health and safety related challenges and risks associated with digital technologies. It aims to raise awareness, provide practical resources and bring stakeholders together.

Digital transformation is one element of the double twin transition (alongside green transition, circularity and suitability) that the chemical, pharmaceutical, plastics and rubber industries need to undergo.

ECEG's President, **Jonas Hagelqvist** *"As the representative of chemical employers, ECEG takes pride in being an official partner of the EU OSHA's campaign, 'Safe and Healthy Work in the Digital Age'. The safeguarding of workers stands as a priority within our industry, and employers are committed to addressing health and safety risks posed by digital technologies in the workplace."*

Together with its social partner, industriAll European Trade Union, ECEG has successfully concluded an EU-funded project on the digital transformation in the chemical sector, *"The impact of innovation and digital transformation in the workplace"* (2018-2019). The health and safety aspect was one of the four cornerstones upon which the desk research and interviews were founded. Our intention is to leverage the existing expertise, share the data we have already acquired with other stakeholders, and learn from our counterparts.
